

PROFESSIONAL SUMMARY

Flutter Developer with 1+ year of experience building scalable, high-performance cross-platform mobile applications using Flutter and Dart. Proficient in state management (Provider, GetX), Firebase integration, and RESTful APIs. Strong experience in real-time applications, UI/UX implementation, and performance optimization. Passionate about delivering production-ready apps in agile environments.

EDUCATION

|                                                                 |                  |
|-----------------------------------------------------------------|------------------|
| • <b>KLSD College</b><br><i>Bachelor's Degree (73%)</i>         | Ludhiana, Punjab |
| • <b>BCM School, Dugri</b><br><i>Higher Secondary Education</i> | Ludhiana, Punjab |

TECHNICAL SKILLS

- **Languages:** Dart, Java (Basics)
- **Frameworks:** Flutter SDK
- **State Management:** Provider, GetX
- **Backend & APIs:** REST APIs, JSON, HTTP Integration
- **Firebase:** Authentication, Push Notifications, Firestore
- **Tools:** Git, GitHub, Android Studio, VS Code
- **Concepts:** Cross-platform Development, MVC/MVVM, Agile, SDLC

EXPERIENCE

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |                                         |

PROJECTS

- **Ride Booking App (User + Driver):** Built real-time ride booking system with live tracking using location services and Google Maps API; implemented driver-user communication and trip management.
- **Grocery Delivery App:** Developed e-commerce app with cart, order management, and payment integration; enhanced UX for seamless checkout flow.
- **Dating App:** Created feature-rich dating platform with user authentication, profile matching, and real-time chat functionality.
- **Stock Market App:** Integrated financial APIs to display real-time stock data and interactive charts/graphs for analytics.
- **Drop Shipping App:** Developed product listing and order management system with API-based inventory handling.
- **Photography App:** Built media-focused application with image upload, gallery management, and optimized storage handling.

KEY HIGHLIGHTS

- Developed 5+ production-level mobile applications
- Experience in real-time features, maps, and scalable architectures
- Strong understanding of mobile UI/UX and app lifecycle
